ZDB data service: test data in MARC 21 with fields for entries in original script

Dear Sir or Madam

In summer 2013 the German Union Catalogue of Serials (ZDB) will commence cataloguing in the original script. Field 880 for original script fields was documented in the description of the MARC 21 delivery service of the ZDB bibliographic data [1] in September 2012 (http://www.zeitschriftendatenbank.de/fileadmin/user_upload/ZDB/pdf/arbeitshilfen/MARC-21-Lieferformat_Titel_August_2012.pdf).

To support you in your interface programming work, we are now providing the first test data on our server in MARC 21 and MARC 21-xml.

Available via WWW:

<http://datendienst.dnb.de/cgi-bin/mabit.pl?userID=testdat&pass=testdat&cmd=login>

Available via FTP:

<ftp://mabtest:mabtest@ftp.dnb.de>

Name of file: ZDBTestOrigKat.mrc

Please note that these test data do not yet contain all relevant fields. They are initially restricted to the main descriptive and subject cataloguing fields. The bibliographic and authority data links will be included in the next step.

The following PICA3 fields are contained in the test data and have been converted to MARC 21:

- 3220 Ansetzungssachtitel
- 3232 Normierter Zeitschriftentitel
- 3260 Weitere Sachtitel
