## Metadata services: Current basic stock of the Integrated Authority File (GND)

Dear Sir or Madam,

The new basic stock/full copy of the Integrated Authority File (GND)<sup>1</sup> scheduled for October/November 2021 is available for downloading<sup>2</sup> in the format variants MARC 21 and MARC21-xml via WWW servers. One file was created for each GND entity on account of the large amount of data (total of approx. 9 million data records).

Since the last full copy the following data enrichment has been carried out:

- | ORCID ID<sup>3</sup> added to approx. 23,000 records for persons (Tp records)

The currently valid field description for the GND is available on our website<sup>4</sup>.

The "Umlenk\_Loesch\_GND ..." file with abbreviated data records is being provided as an additional service to track all redirects ("x" in position 5 of the leader in MARC 21) and deletions ("d" in position 5 of the leader in MARC 21) made since the previous full copy of the GND. This file is useful for customers who used the control number in MARC field 001 to determine the valid GND number for redirects when transferring the GND data.

The file is not relevant for customers who synchronise their GND collection with the GND, i.e. who constantly track redirects and deletions via the OAI interface or the weekly change service. Further information on the procedure for redirects and deletions can be obtained from our website<sup>5</sup>.
