

7. March 2022

Metadata services: Changes in RDF format from 7 June 2022 (Export Release 2022.02)

1. Release schedule

In accordance with the German National Library's (DNB) release planning for export formats¹, the next change in the conversion and data modelling will take place on 7 June 2022. There may be disruptions to the interfaces and the Data Shop between 08:00 and 12:00 noon during the technical changeover.

2. Linked Data Service in general

2.1. Full copies

Following the export releases, it is expected that updated full copies of the Integrated Authority File (GND²) and the DNB's bibliographic data will be made available for download in the serialisation formats RDF/XML, Turtle, JSON-LD, as an HDT file³ and in N-Triples as of March, June/July and October/November⁴.

Metadata provenance dump deliveries are effected at the same intervals. The provenance information is modelled along the lines of PROV Ontology⁵ and published in the form of a separate data copy. Additional information regarding planning, documentation and modelling is available on the DNB WIKI⁶.

Full copies of the bibliographic data from the German Union Catalogue of Serials (ZDB) and the Address data of the German ISIL and Library Code Agency⁷ will be updated in March and October/November.

3. Changes to the Linked Data Service

- | New feature:
Meta information is provided in particular data dumps (authorities*_lds, bib_lds, dnb-all_lds, zdb_lds). This information includes details about licensing, the data provider, version information and short, human-readable descriptions of the data.

Example for authorities_ids

4. Publication of RDF vocabularies

In addition to the announcement of changes in RDF format, dated preliminary versions of the RDF vocabularies for "DNB Metadata Terms" will also be provided in line with release planning. The preliminary versions for release 2022.02 can be accessed at:

- | https://d-nb.info/standards/elementset/dnb_20220607 (DNB Metadata Terms)

Changes in DNB Metadata Terms

- | New feature:
The two new object properties dnbt:attributionRequired and dnbt:copyrighted have been added to describe statements from licence information.

5. Changes in GND conversions

5.1. Cross-concordance

- | New feature:
As additional data dumps along with this release, cross-concordances between the GND and other thesauri are provided as linked data for the first time, and will be provided at the usual frequency of three times a year in the future.
The cross-concordances (= mappings) available here are intellectually generated relations between the standardised vocabulary of two thesauri. The authoritiy file that is networked in this way, allows for (multi-lingual) meta searches in library catalogues and portals, as well as supporting external data transfer and automatic indexing procedures.
SKOS⁹ (Simple Knowledge Organization System) is used to describe the terms and the relationships between the terms.

5.1.1. GND – STW (Thesaurus for Economics)

The mapping between the economics section of the GND and the Standard Thesaurus for Economics¹⁰, that contains vocabulary for all topics related to economics as well as from related disciplines such as law, sociology, politics and geographic terms, is managed and made available as part of an ongoing cooperation between the DNB and the ZBW¹¹.

¹⁰ <https://zbw.eu/stw/version/latest/about.en.html>

¹¹ <https://www.zbw.eu/en/>

For example

```
@prefix skos: <http://www.w3.org/2004/02/skos/core#> .  
@prefix dcterms: <http://purl.org/dc/terms/> .  
  
<https://d-nb.info/gnd/1123527725> dcterms:isPartOf <https://d-nb.info/datasets/authorities> ;  
    skos:inScheme <https://d-nb.info/datasets/authorities> ;  
    skos:closeMatch <http://zbw.eu/stw/descriptor/30200-2> ;  
    skos:prefLabel "Agilität <Management>"@de .

    skos:closeMatch <https://d-nb.info/gnd/1123527725> ;  
    skos:prefLabel "Agilität"@de .
```

Examples in the test file:

```
|   authorities-gnd-stw_TESTDATE.jsonld  
|   authorities-gnd-stw_TESTDATE.nt  
|   authorities-gnd-stw_TESTDATE.rdf  
|   authorities-gnd-stw_TESTDATE.ttl
```

In the future, the respective dump can be found at <https://data.dnb.de/opendata/> under the following name:

mapping-authorities-gnd-stw_lds_{datum}.FORMAT.gz

5.1.2. GND – MeSH (Medical Subject Headings)

The mapping between the medicine section of the GND and the thesaurus by the National Library of Medicine¹² that is used around the world, is updated with biomedical terms and made available as part of an ongoing cooperation between the DNB and the ZBMed¹³, who is in charge of German translations of MeSH¹⁴.

For example:

```
@prefix skos: <http://www.w3.org/2004/02/skos/core#> .  
@prefix dcterms: <http://purl.org/dc/terms/> .  
  
<https://d-nb.info/gnd/040012204> dcterms:isPartOf <https://d-nb.info/datasets/authorities> ;

|   authorities-gnd-mesh_TESTDATEN.nt
|   authorities-gnd-mesh_TESTDATEN.rdf
|   authorities-gnd-mesh_TESTDATEN.ttl
```

In the future, the respective dump can be found at <https://data.dnb.de/opendata/> under the following name:

5.2. Entity Facts profile

New feature:

For any image links originating from Wiki Commons, licence notices from Wikimedia Commons are adopted without modifications by many entities. This includes, in particular, information about the image's licensing, who created the image and the text that must be added as source and reference information in case of any subsequent use of the image. This information may contain HTML code.

For example: Excerpt from <https://hub.culturegraph.org/entityfacts/119033364>
